PROFESSIONAL SUMMARY

Unity developer with 5 years of professional experience shipping production software in a highly regulated industry, where every release must pass strict certification. Strong at working within complex existing codebases, turning detailed specifications into reliable features, and delivering on deadline. Looking to bring this experience to game development and Unity applications.

TECHNICAL SKILLS

Programming Languages: C# (professional), C++ (professional), Python, Java, SQL (MySQL), JSON, XML
Engines: Unity (professional), Unreal Engine 4
Tools & Workflow: Perforce, Git, TeamCity, Jira, Confluence, GitHub Copilot, Cursor
Areas: Gameplay programming, UI systems, regulatory compliance implementation, math model and game rules integration, porting, debugging, performance optimization, object-oriented design
Spoken Languages: English, Mandarin

PROFESSIONAL EXPERIENCE

Software Developer **Dec 2021 – Present**
IGT Canada Solutions ULC – Moncton, NB, Canada

- Adapt and port 17+ existing slot titles to meet the regulations, math models, and game rules of multiple jurisdictions.
- Implement jurisdiction-specific features and rule changes to satisfy regulatory compliance requirements and support certification of games for each market.
- Integrate math models and game rules into game logic so that game behaviour matches design and regulatory specifications.
- Develop gameplay features and UI systems in Unity and C#; spent first year developing in C++.
- Collaborate with game designers, QA, and artists to turn requirements into features, resolve defects, and ship releases.
- Debug and resolve gameplay and performance issues while keeping production code clean and reusable.
- Received multiple performance-based bonuses for contributions to high-performing titles in live operations.

Online Math Tutor **Oct 2021 – Jan 2024**
OnePath Education Co., Ltd., Taipei, Taiwan (Remote)

- Taught mathematics remotely to elementary and middle school students, explaining concepts clearly and adapting lessons to each student's level.

SELECTED PROJECTS

- Inventory System (Unity): A full inventory system in a 3D scene with item pickup, equipment slots, tooltip, hotbar, stacking and splitting, filtering, search, sorting, and item use/drop.
- Auto-Battle RPG (Unity): A 2D auto-battler with player-cast skills, multiple characters, loot and gold-driven upgrades, and endless stage progression.

EDUCATION

Game Programming Advanced Diploma **Jan 2019 – Apr 2021**
George Brown College – Toronto, ON | Dean's List, all 6 semesters

Bachelor of Information and Library Science **Sep 2013 – Jun 2017**
Tamkang University – New Taipei City, Taiwan | Varsity Athlete Scholarship (2015, 2016)
